

Russia Murders 5000 Dolphins

Lifeless masterpieces
Strewn haphazardly,
Tuzly Estuaries
National Nature Park
Odessa Oblast,
Southwestern Ukraine.

Russia's resource war
Slaughtering defenceless mammals,
March to July,
Five thousand dolphins
Black Sea collaterals,
Rus Military Maritime Fleet,
Powerful hydrocollators,
Heinous lagoon explosions,
Rapid dolphin surfacings,
Blood clots,
Deadly bends!

Godawful naval games
Inflicting fatal acoustic trauma,
Perforating eardrums,
Paralysis,
Excruciating pain,
Echolocation undone,
Exsanguination!

No Black Sea dolphins,
No intelligent blue kin,
Joyless
Age of Loneliness.
Smirkin' autocratic Putin,
Depose posthaste.
